

**Bridgemaster® and Standard Mixer
serial number information decal location
change**

Date: April 26, 2021
Bulletin Name: MXR-TSIB-034
Model: Bridgemaster and Standard Mixers
Model Year: 2021
Units Affected: Those with in-service dates of April 2021 and later

Purpose:

In this technical service information bulletin, McNeilus Truck and Manufacturing releases information for new decals created for the mixer serial number and Bridgemaster® Axle serial number. These new decals replace stamped serial numbers on the mixer front pedestal. The decals will be printed with the correct serial number for your mixer and if it is a Bridgemaster Mixer, then the serial number for your Bridgemaster Axle will have an additional decal. These new decals are located on the inside of the driver's doorjamb, near the complete vehicle decal.

For questions, contact McNeilus at 888-686-7278.

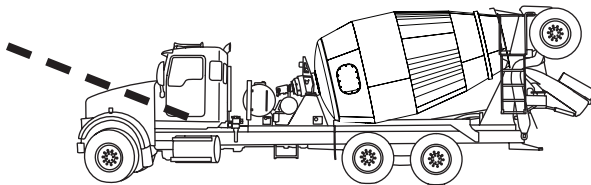

Will be on both Bridgemaster and Standard Mixers (models 93 and 90 respectively).

Will be on Bridgemaster Mixers (model 93) only.

For reference, the new decal(s) will be placed on the inside of the driver's doorjamb. They may be placed near the existing complete vehicle decal image (shown below for your reference).

Decal location on inside doorjamb
